Virus Research

Contents of Volume 39

No. 1

Publisher's Note

Virus nomenclature 1

Research Papers

M.C. Outlaw and C.R. Pringle (UK)
Sequence variation within an outbreak of measles virus in the Coventry area during spring/summer 1993 3

G.W. Fang, R.F. Allison, E.M. Zambolim, D.P. Maxwell and R.L. Gilbertson (USA)
The complete nucleotide sequence and genome organization of bean common mosaic virus (NL3 strain) 13

K.-i. Ohba, M. Mizokami, T. Ohno, K. Suzuki, E. Orito, J.Y.N. Lau, Y. Ina, K. Ikeo and T. Gojobori (Japan, USA)
Relationships between serotypes and genotypes of hepatitis B virus: genetic classification of HBV by use of surface genes 25

M. Bodéus, M. Heusterspreute, F. Hirsch, R. Benarous, H. Bazin and G. Burtonboy (Belgium, France)
An anti-HIV-1 gag protein rat monoclonal antibody library 35

M.S. Lapatschek, M. Marschall and H. Meier-Ewert (Germany)
The persistent variant of influenza C virus carries one characteristic point mutation in RNA segment 1 47

K. Maeda, K. Hirasawa, Y. Kawaguchi, M. Ono, T. Mori, T. Gemma, N. Yokoyama, K. Doi and T. Mikami (Japan)
Expression and identification of the feline herpesvirus type 1 glycoprotein B (gp143/108) 55

B.C. Horsburgh and T.D.K. Brown (UK)
Cloning, sequencing and expression of the S protein gene from two geographically distinct strains of canine coronavirus 63

A.J. Bett, V. Krougliak and F.L. Graham (Canada)
DNA sequence of the deletion/insertion in early region 3 of Ad5 *dl*309 75

Book Review

AIDS Testing
G. Schochetman and J.R. George 83

Erratum 85

No. 2

Research Papers

R. Zell, K. Klingel, M. Sauter, U. Fortmüller and R. Kandolf (Germany)
Coxsackieviral proteins functionally recognize the polioviral cloverleaf structure of the 5′-NTR of a chimeric enterovirus RNA: influence of species-specific host cell factors on virus growth 87

K. Subbarao, R.G. Webster, Y. Kawaoka and B.R. Murphy (USA)
Are there alternative avian influenza viruses for generation of stable attenuated avian–human influenza A reassortant viruses? 105

M.S. Marín, J.M. Martín Alonso, L.I. Pérez Ordoyo García, J.A. Boga, J.L. Argüello-Villares, R. Casais, K. Venugopal, W. Jiang, E.A. Gould and F. Parra (UK, Spain)
Immunogenic properties of rabbit haemorrhagic disease virus structural protein VP60 expressed by a recombinant baculovirus: an efficient vaccine 119

T.W. Geisbert and P.B. Jahrling (USA)
Differentiation of filoviruses by electron microscopy 129

M.A. Forsyth and T. Barrett (UK)
Evaluation of polymerase chain reaction for the detection and characterisation of rinderpest and peste des petits ruminants viruses for epidemiological studies 151

L. Ivanova, L. Le and M.J. Schlesinger (USA)
Characterization of revertants of a Sindbis virus 6K gene mutant that affects proteolytic processing and virus assembly 165

W.L. Gray, N.J. Gusick, C. Ek-Kommonen, S.E. Kempson and T.M. Fletcher III (USA)
The inverted repeat regions of the simian varicella virus and varicella-zoster virus genomes have a similar genetic organization 181

B.A. Brown and M.A. Pallansch (USA)
Complete nucleotide sequence of enterovirus 71 is distinct from poliovirus 195

L.I. Pritchard and A.R. Gould (Australia)
Phylogenetic comparison of the serotype-specific VP2 protein of bluetongue and related orbiviruses 207

J. Barr and A.J. Easton (UK)
Characterisation of the interaction between the nucleoprotein and phosphoprotein of pneumonia virus of mice 221

A. Plyusnin, Y. Cheng, O. Vapalahti, M. Pejcoch, J. Unar, Z. Jelinkova, H. Lehväslaiho, Å. Lundkvist and A. Vaheri (Finland, Czech Republic, Sweden)
Genetic variation in Tula hantaviruses: sequence analysis of the S and M segments of strains from Central Europe 237

S. Sánchez-Palomino, J. Dopazo, I. Olivares, M.J. Martin and C. López-Galíndez (Spain)
Primary genetic characterization of HIV-1 isolates from WHO-sponsored vaccine evaluation sites by the RNase-A mismatch method 251

C.S. Ricard, C.A. Koetzner, L.S. Sturman and P.S. Masters (USA)
A conditional-lethal murine coronavirus mutant that fails to incorporate the spike glycoprotein into assembled virions 261

E.D. Chirnside, P.M. Francis and J.A. Mumford (UK)
Expression cloning and antigenic analysis of the nucleocapsid protein of equine arteritis virus 277

M. Suresh, S. St. Cyr and J.M. Sharma (USA)
Molecular cloning and sequence analysis of the penton base genes of type II avian adenoviruses 289

S.B. Kleiboeker (USA)
Sequence analysis of the fiber genomic region of a porcine adenovirus predicts a novel fiber protein 299

H. Zimmermann, H.J. Eggers, A. Zimmermann, W. Kraus and B. Nelsen-Salz (Germany)
Complete nucleotide sequence and biological properties of an infectious clone of prototype echovirus 9 311

J. Hörling, Y. Cheng, A. Plyusnin, K. Persson, H. Lehväslaiho, A. Vaheri, B. Niklasson and Å. Lundkvist (Sweden, Finland)
Nucleotide and deduced amino acid sequences of the M and S genome segments of a Swedish Puumala virus isolate 321

K.S. Faaberg, G.A. Palmer, C. Even, G.W. Anderson and P.G.W. Plagemann (USA)
Differential glycosylation of the ectodomain of the primary envelope glycoprotein of two strains of lactate dehydrogenase-elevating virus that differ in neuropathogenicity 331

M. Rémond, P. Sheldrick, F. Lebreton and T. Foulon (France)
Sequence of the canine herpesvirus thymidine kinase gene: taxon-preferred amino acid residues in the alphaherpesviral thymidine kinases 341

C. Even, R.R.R. Rowland and P.G.W. Plagemann (USA)
Mouse hepatitis virus infection of mice causes long-term depletion of lactate dehydrogenase-elevating virus-permissive macrophages and T lymphocyte alterations 355

Z. Chen and P.G.W. Plagemann (USA)
Detection of related positive-strand RNA virus genomes by reverse transcription/polymerase chain reaction using degenerate primers for common replicase sequences 365

S. Abbasi, W. Gruber, K. Edwards, L. Gubareva, R.G. Webster and Y. Kawaoka (USA)
The HA1 of cold-adapted influenza B vaccine is not altered during replication in human vaccinees 377

Book Reviews

The Theory and Practical Application of Adjuvants
D.E.S. Stewart-Tull 385

Immunology of Infection
J.G.P. Sissons, L.K. Borysiewicz and J. Cohen 386
